

COMPANY PROFILE

COMPANY PROFILE

Top I Vision Ltd. was founded in 1996 by the Shen-Tal family and Lev Peisihis, with the purpose of designing and manufacturing T.V. quality aerostat systems.

Today the company develops and manufactures tactical surveillance solutions, such as tactical aerostat systems (TAS), tactical UAVs, as well as ground and airborne stabilized payloads.

Top I Vision is a pioneer in the field of super lightweight tactical stabilized payloads.

Our objective is to combine excellent products with outstanding service to our customers. All activities at Top I Vision meet the highest international quality standards.

Top I Vision's customers range from governments, through world leading television production and broadcasting companies, to military industries. We deliver high quality turnkey solutions.

Summary of our main products and activities:

- Super lightweight stabilized payloads
- Tactical surveillance aerostats
- Mini tactical UAVs
- Command and control stations
- RF systems
- System integration
